

INSTALACIÓN Y CONFIGURACIÓN DE SOURCETREE

INSTALACIÓN DE SOURCETREE

- Descargar de la página oficial la última versión de **soucetree**:
<https://www.sourcetreeapp.com/>. En este caso es la versión 3.4.26.

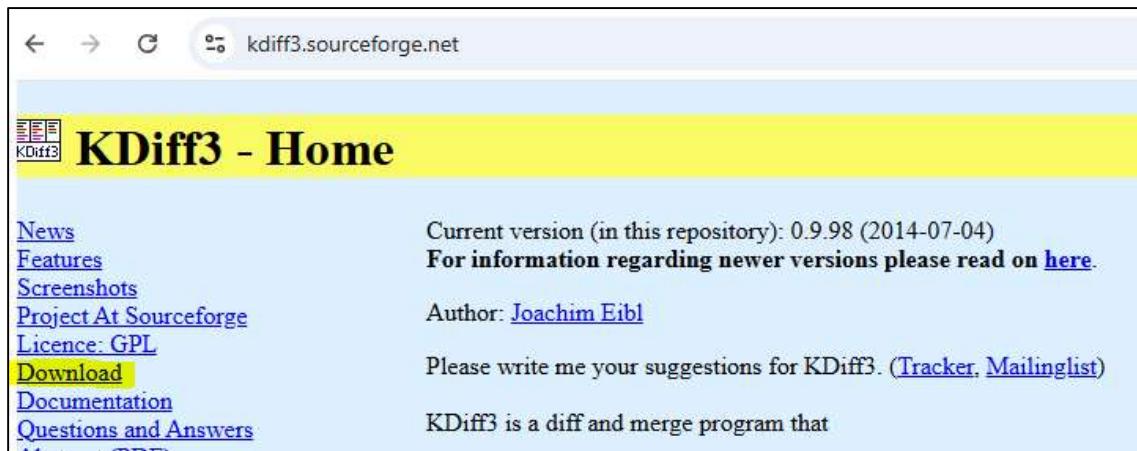

- Durante la instalación, seleccionar Bitbucket y desmarcar Mercurial.

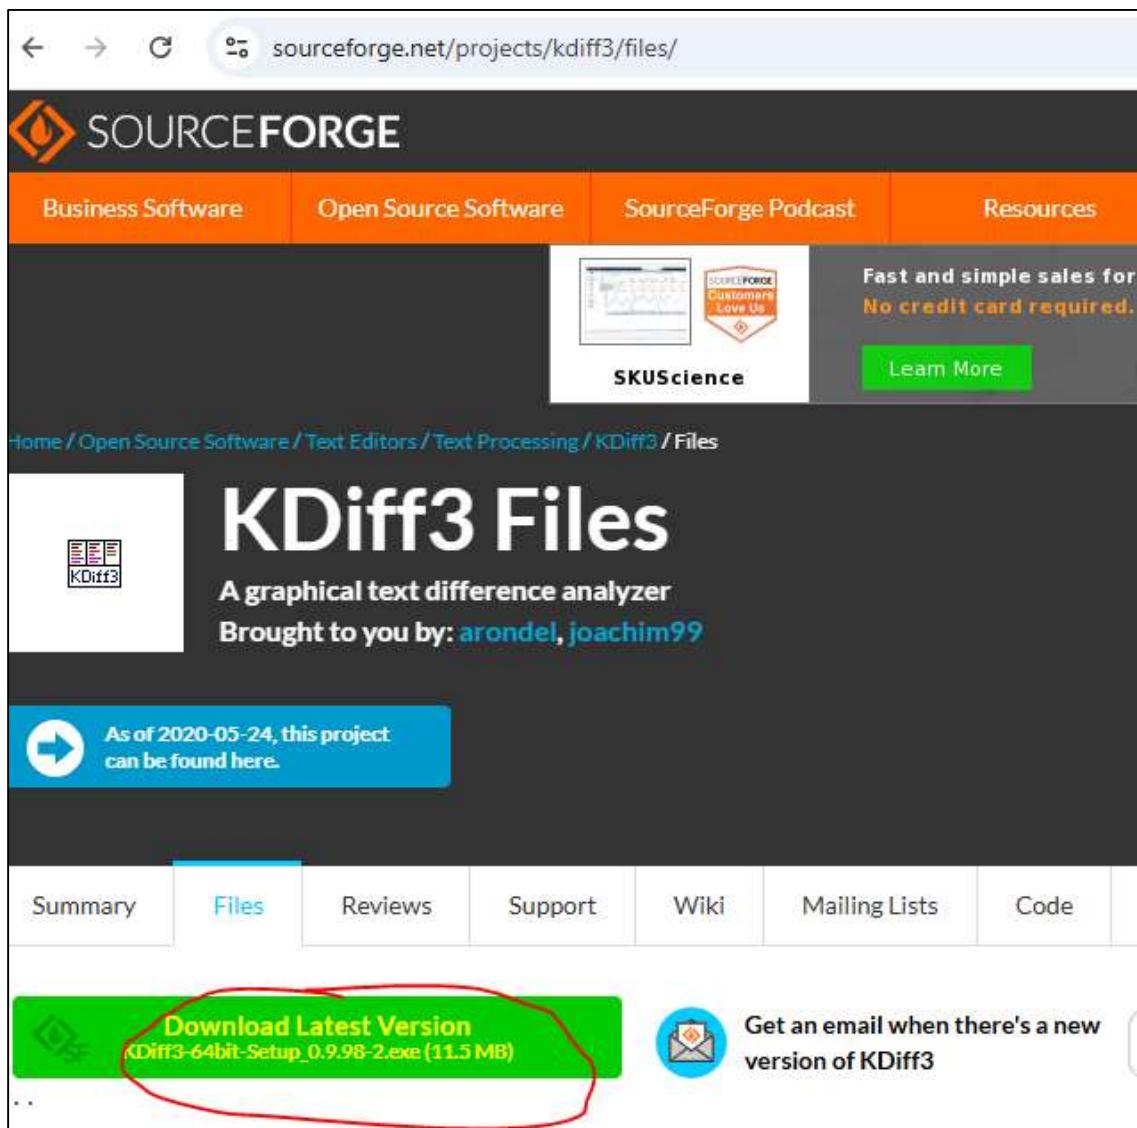

INSTALACIÓN DE KDIFF3

Para resolver los conflictos de realizar merges vamos a utilizar una herramienta externa llamada KDIFF3.

- Descargar de la página oficial el programa **kdiff3**: <http://kdiff3.sourceforge.net/>. En este caso es la versión 0.9.98.

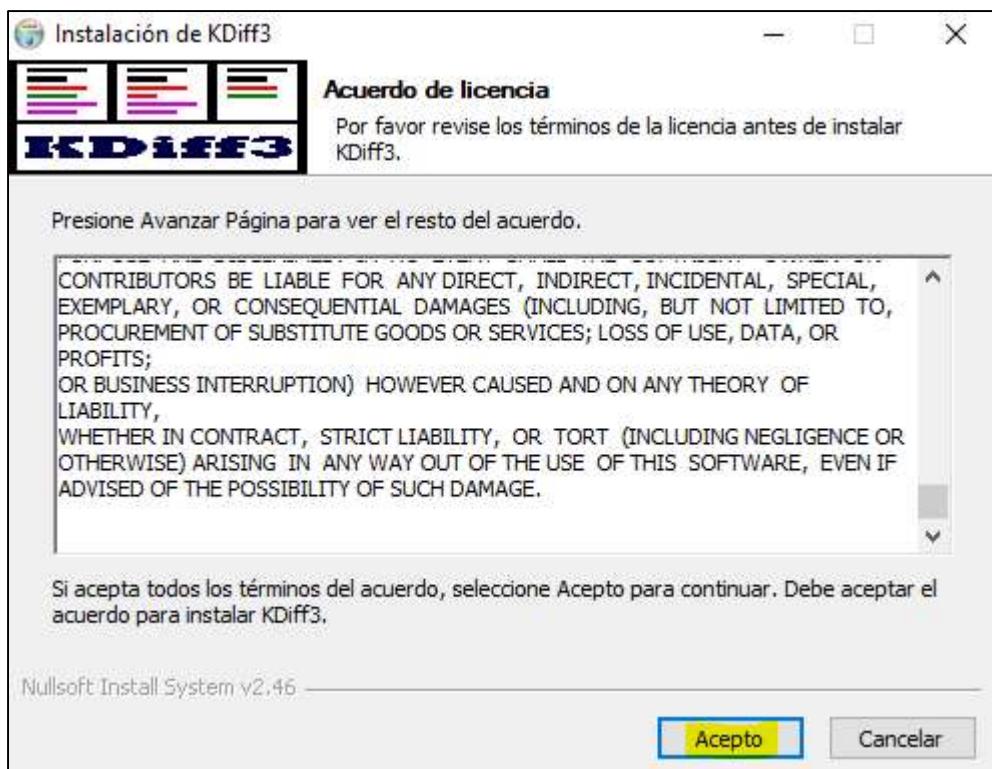

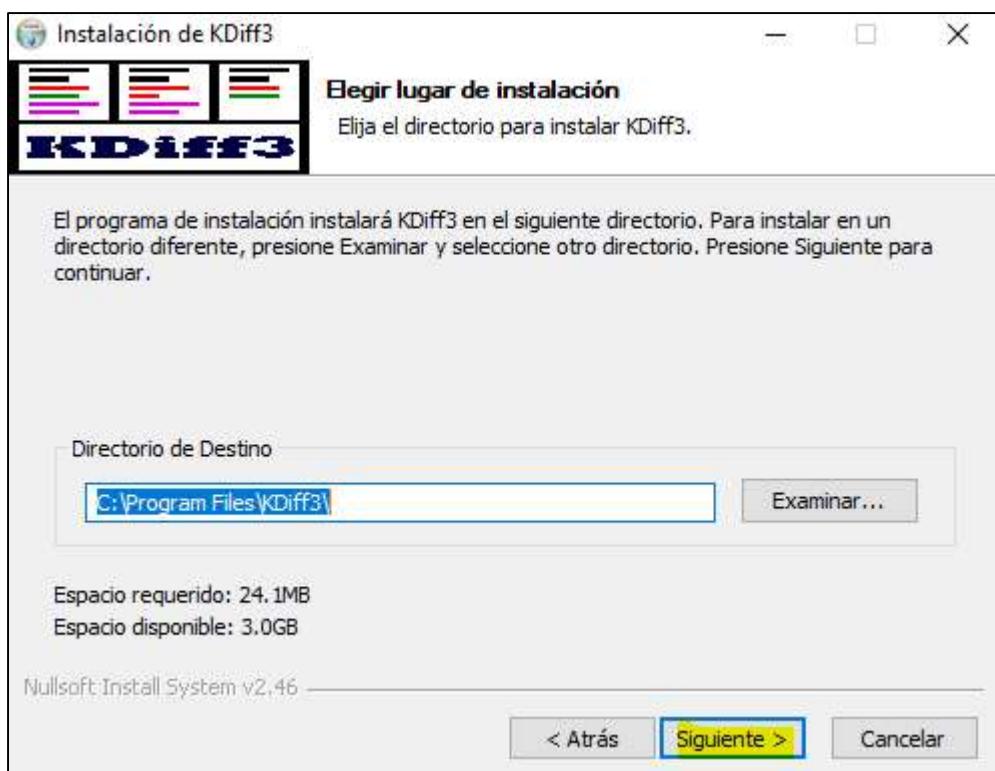

The screenshot shows the KDiff3 project page on SourceForge. The URL in the address bar is `kdiff3.sourceforge.net`. The page has a yellow header bar with the KDiff3 logo and the text "KDiff3 - Home". On the left, there's a sidebar with links: News, Features, Screenshots, Project At Sourceforge, Licence: GPL, Download, Documentation, Questions and Answers. To the right, it says "Current version (in this repository): 0.9.98 (2014-07-04)" and "For information regarding newer versions please read on [here](#)". Below that, it says "Author: Joachim Eibl" and "Please write me your suggestions for KDiff3. ([Tracker](#), [Mailinglist](#))". At the bottom, it says "KDiff3 is a diff and merge program that".

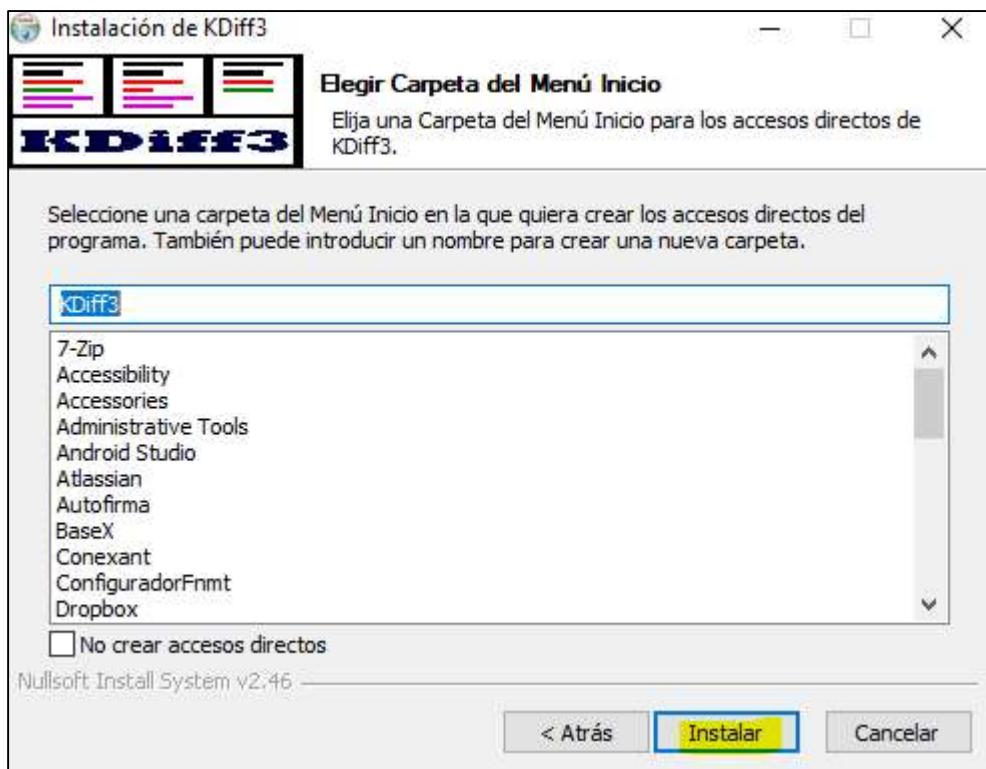

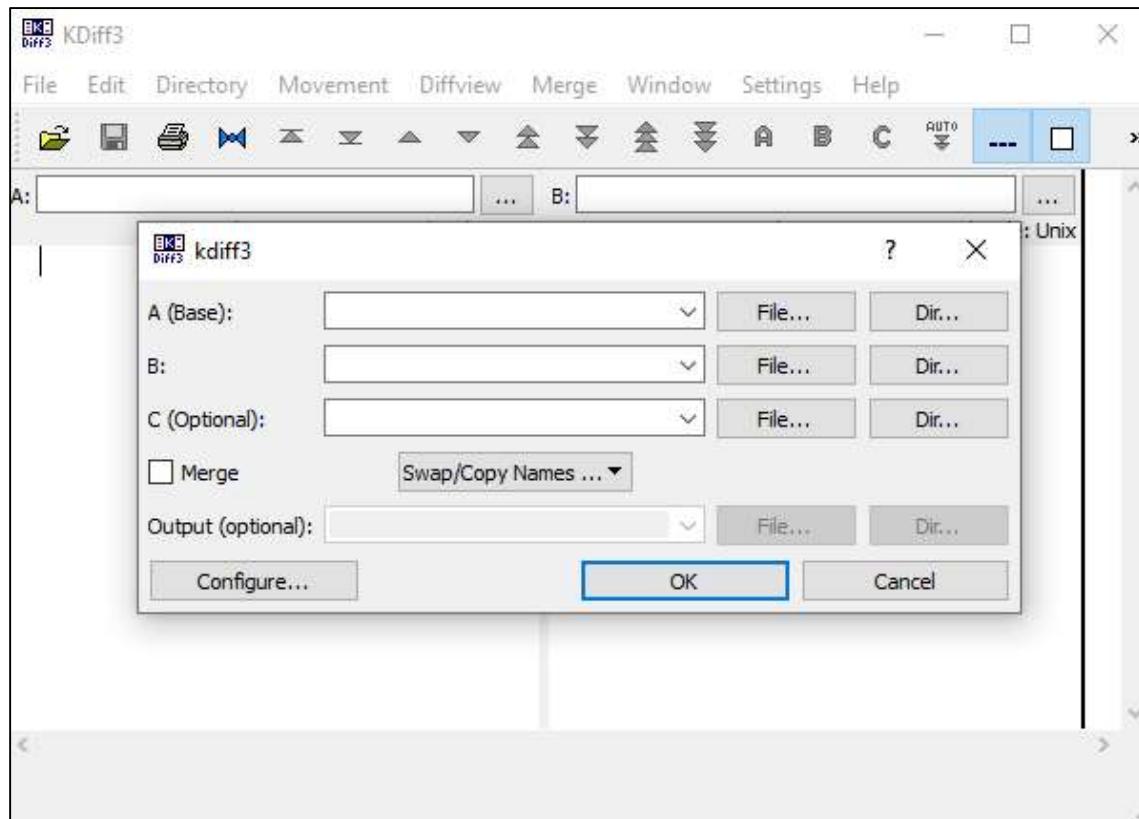

The screenshot shows the "Files" section of the KDiff3 project page on SourceForge. The URL in the address bar is `sourceforge.net/projects/kdiff3/files/`. The page features the SourceForge logo and navigation tabs for Business Software, Open Source Software, SourceForge Podcast, and Resources. A banner for SKUScience is visible. The main content area displays the title "KDiff3 Files" and a description: "A graphical text difference analyzer" and "Brought to you by: arondel, joachim99". A blue box contains the message "As of 2020-05-24, this project can be found here." Below this, a navigation bar includes tabs for Summary, Files (which is selected), Reviews, Support, Wiki, Mailing Lists, and Code. A large green button at the bottom left says "Download Latest Version" with the file name "KDiff3-64bit-Setup_0.9.98-2.exe (11.5 MB)". To the right, there's a link to "Get an email when there's a new version of KDiff3".

- Ejecutamos el instalador y procedemos a su instalación (dejar las opciones por defecto y pulsar 'Siguiente' hasta el final):

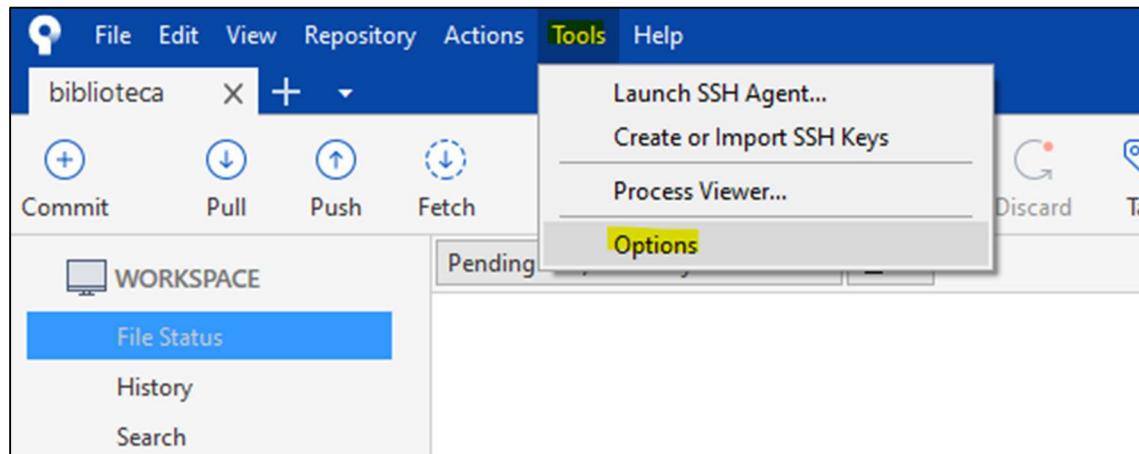

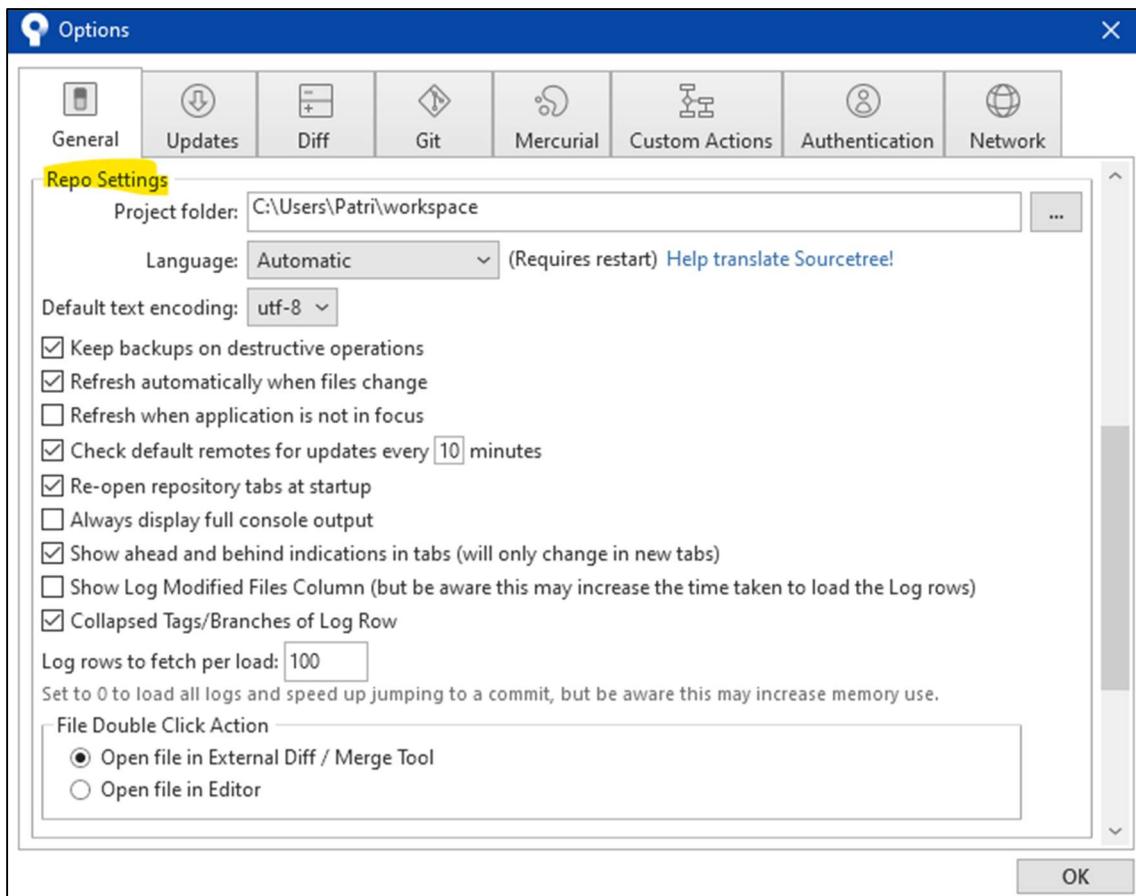

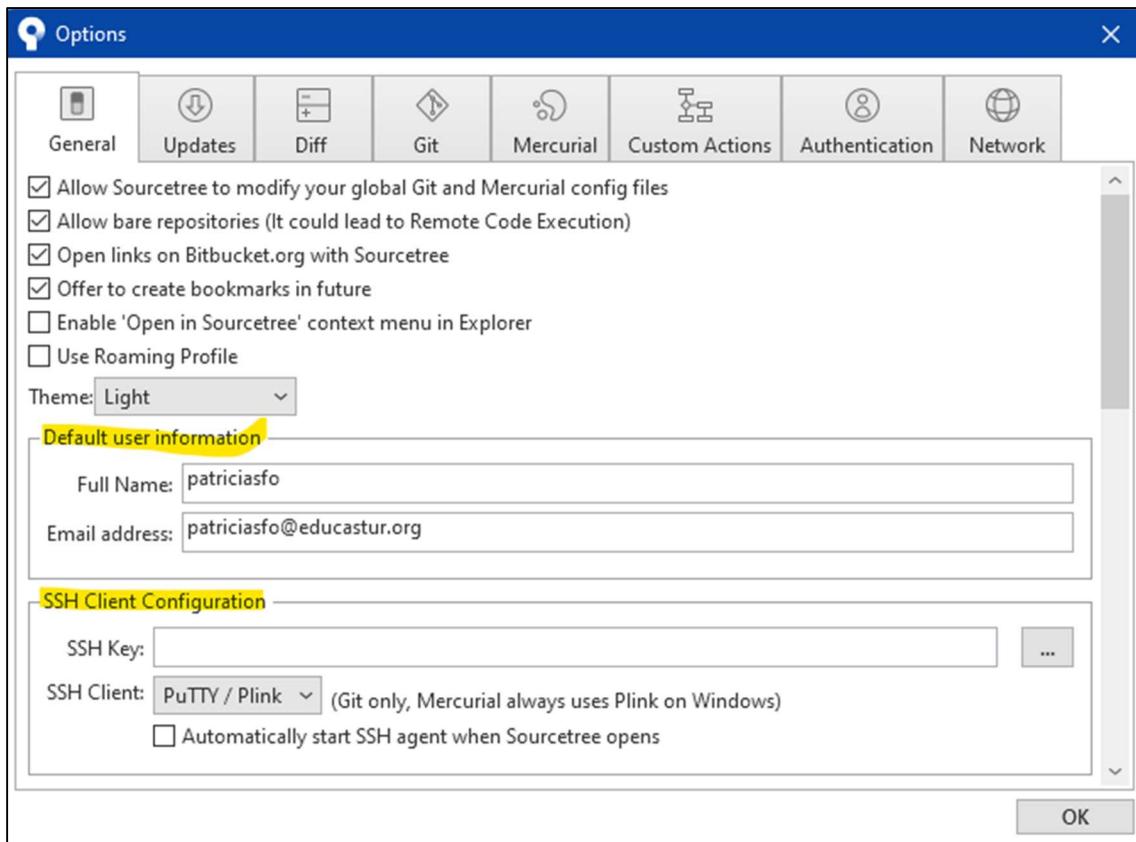

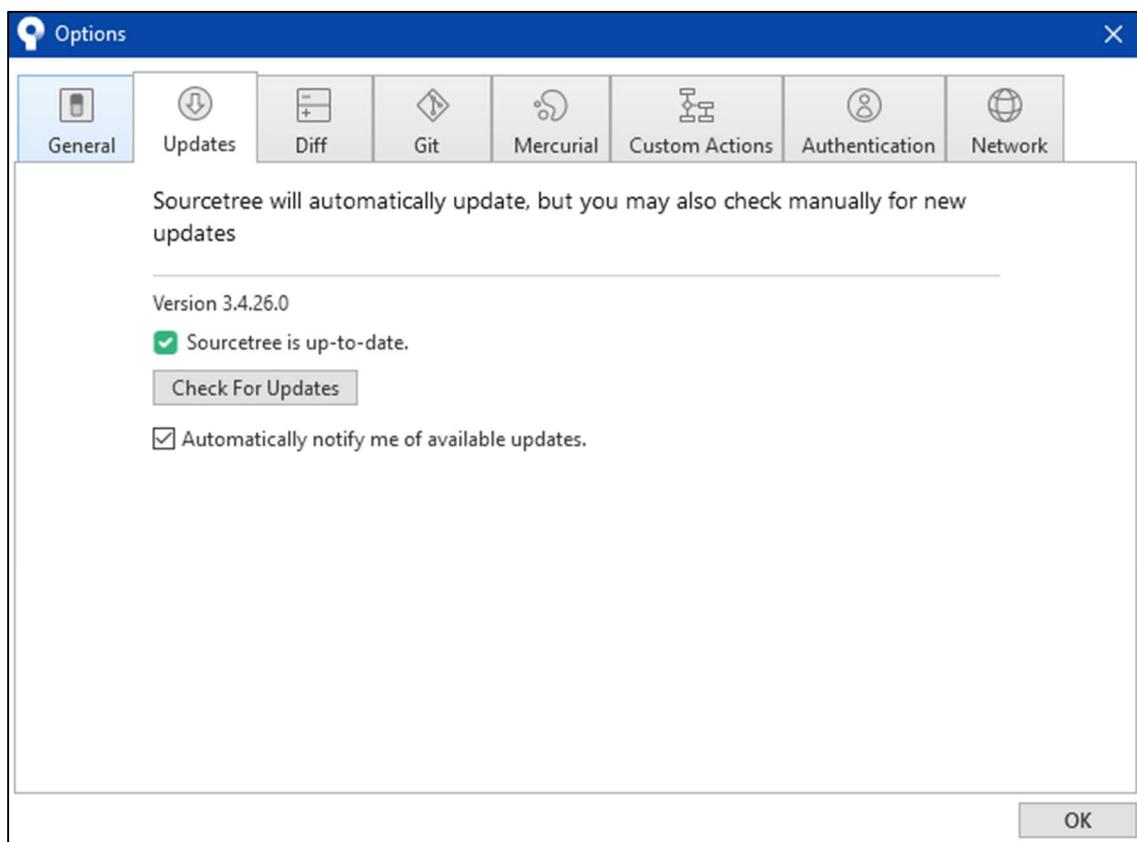

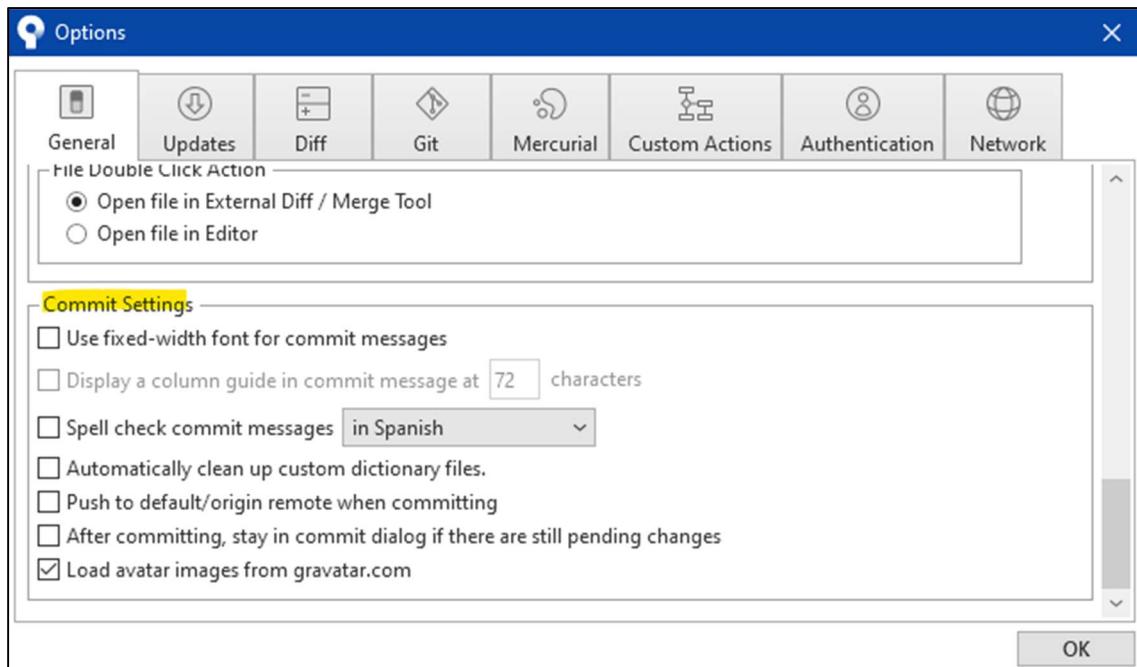

- Una vez instalado, lo cerramos porque lo utilizaremos desde Sourcetree y no directamente.

CONFIGURACIÓN DE SOURCETREE

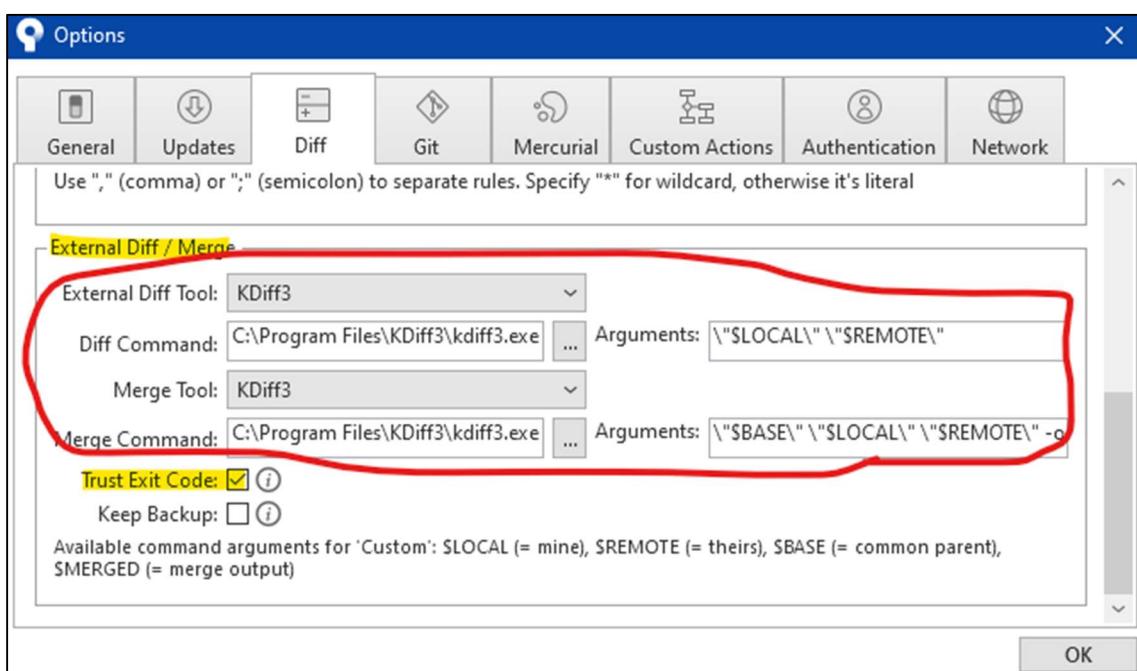

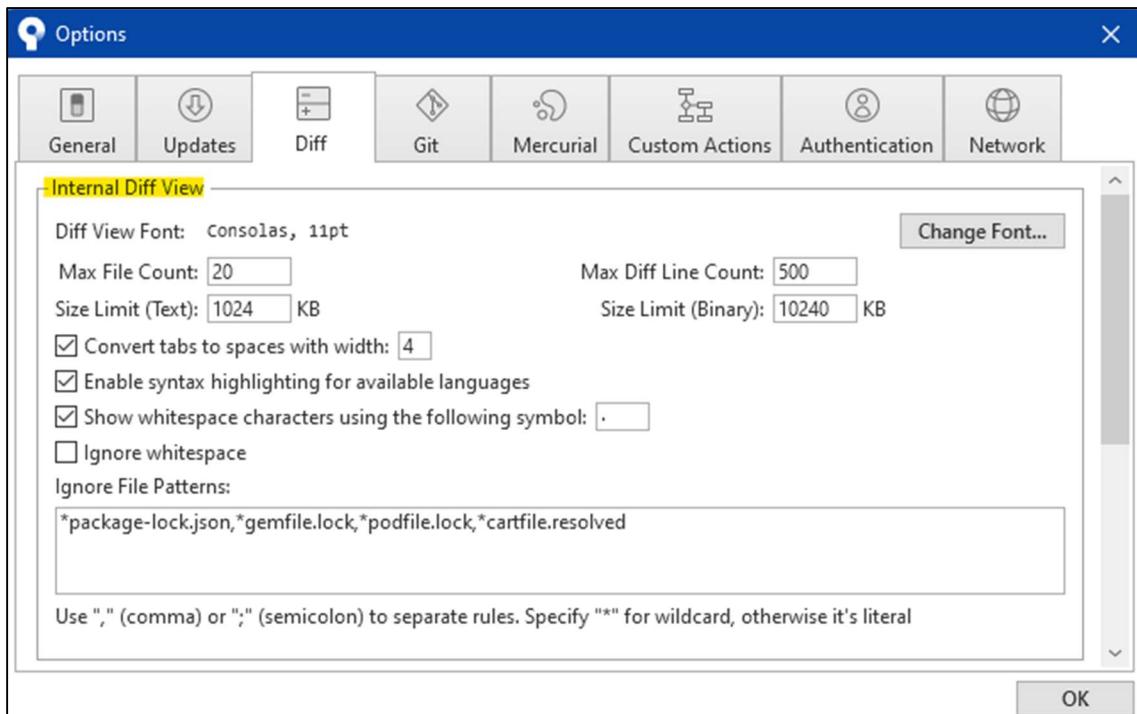

- Tools -> Options

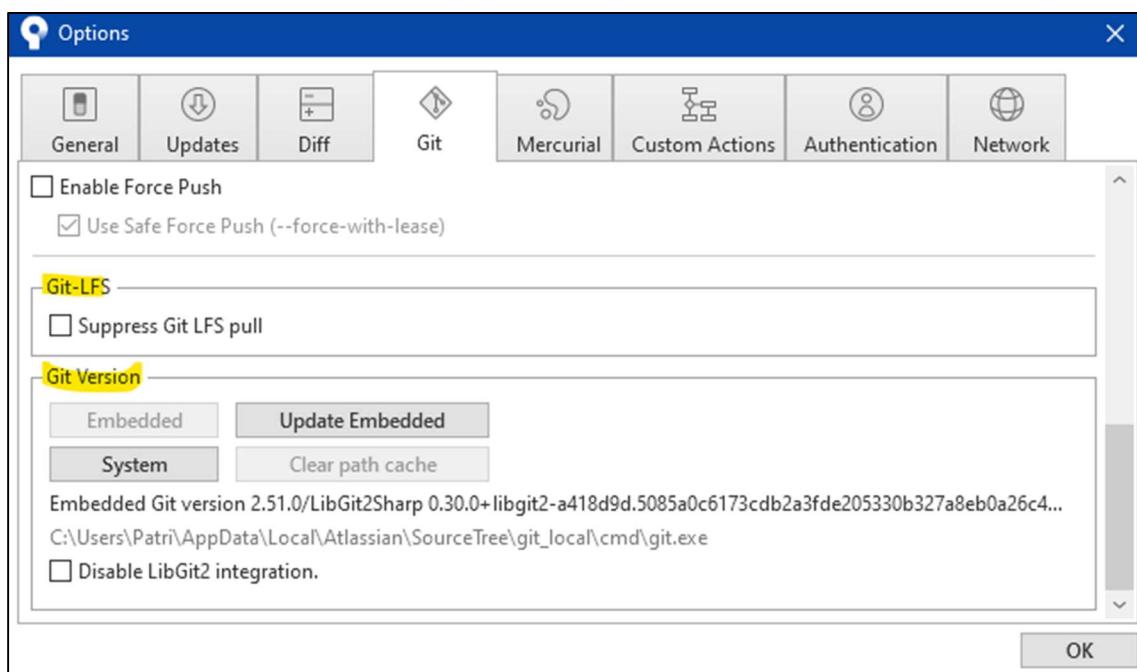

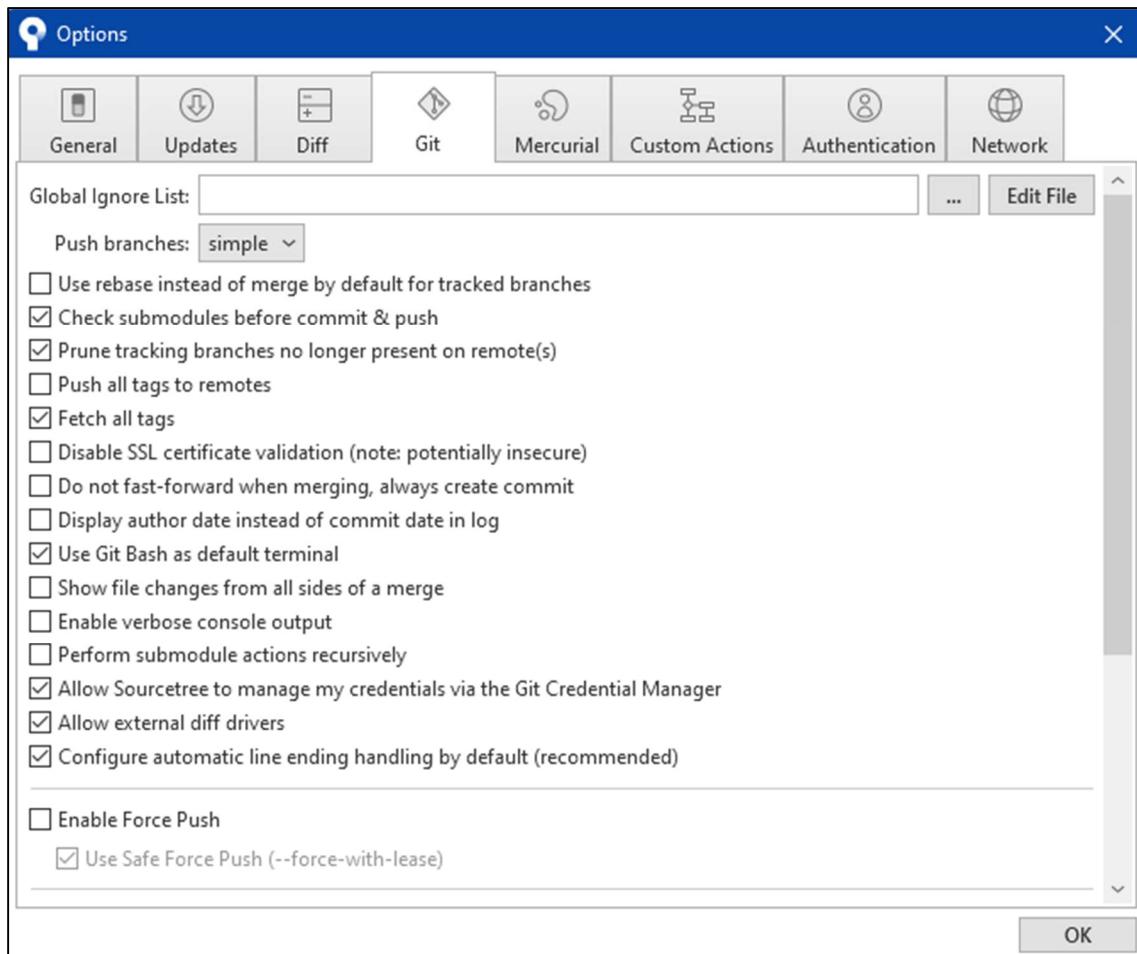

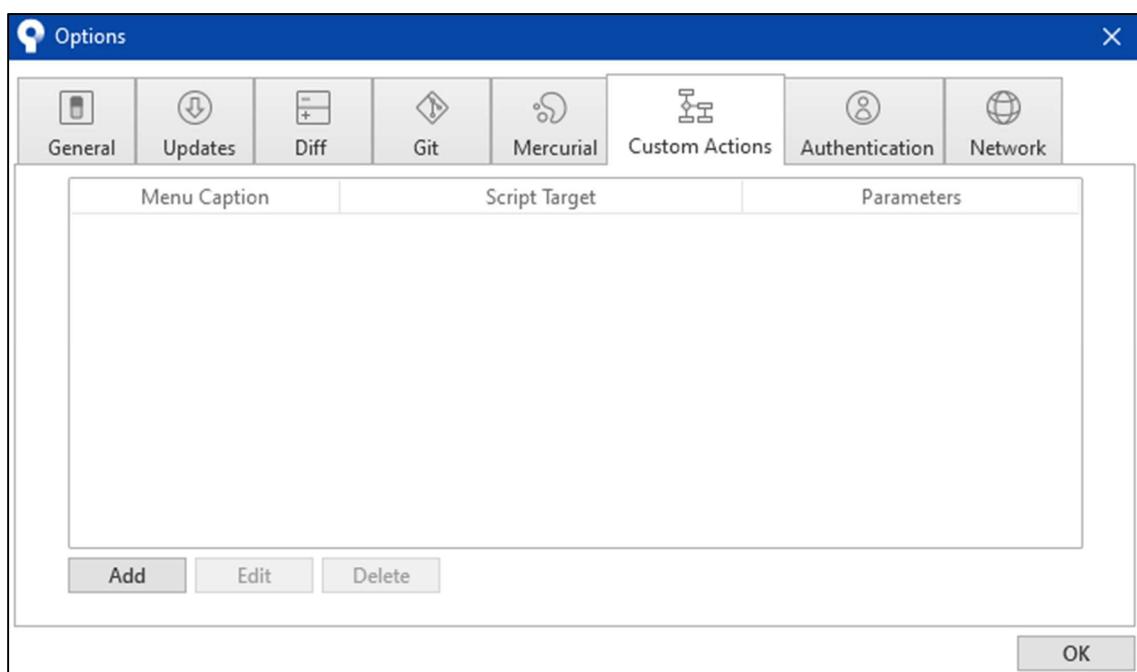

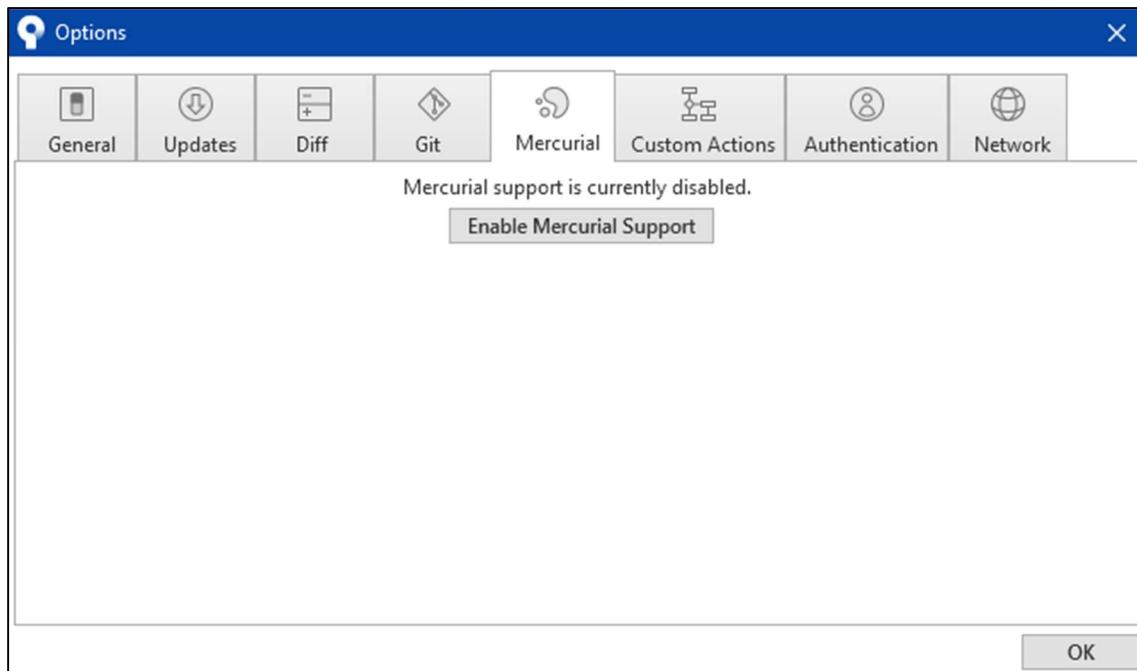

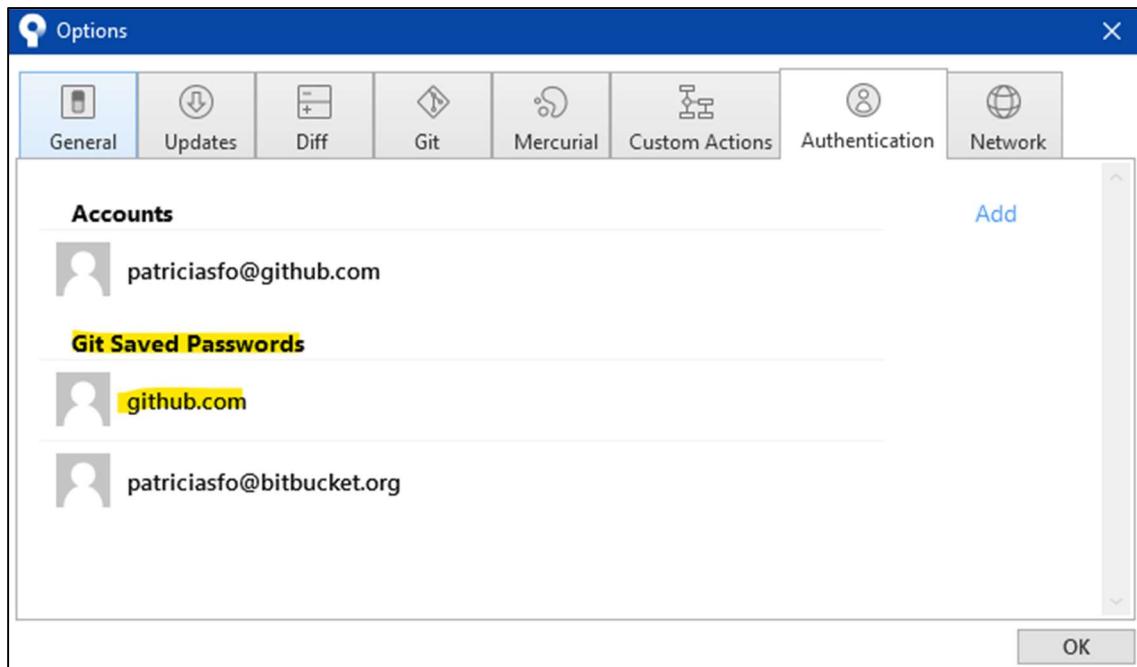

En la pestaña Diff es donde configuraremos el KDIFF3 previamente instalado:

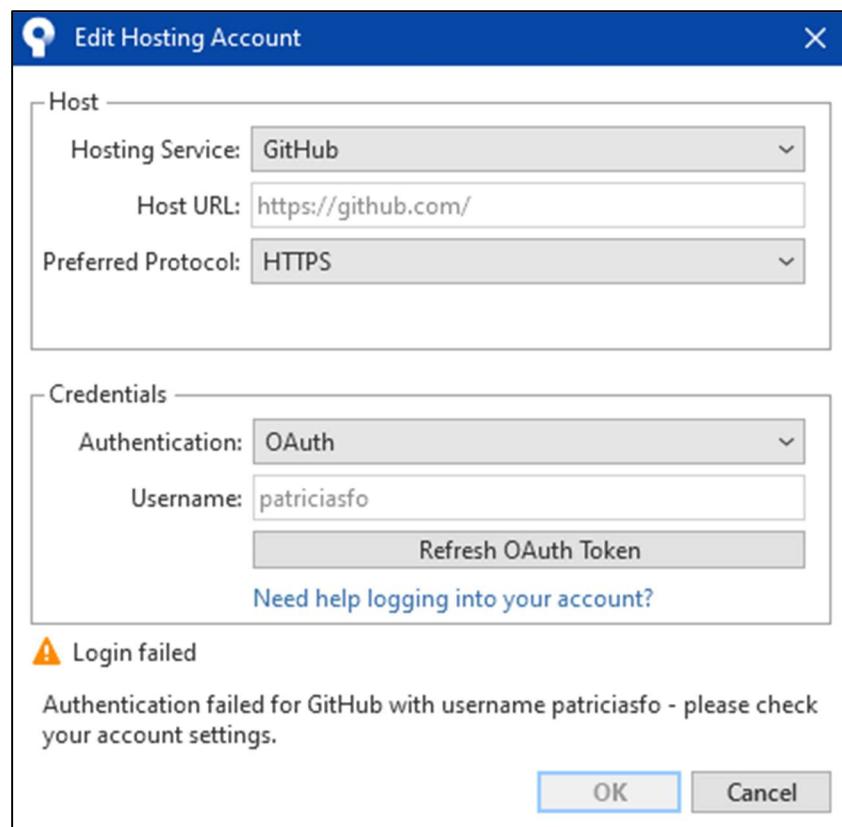

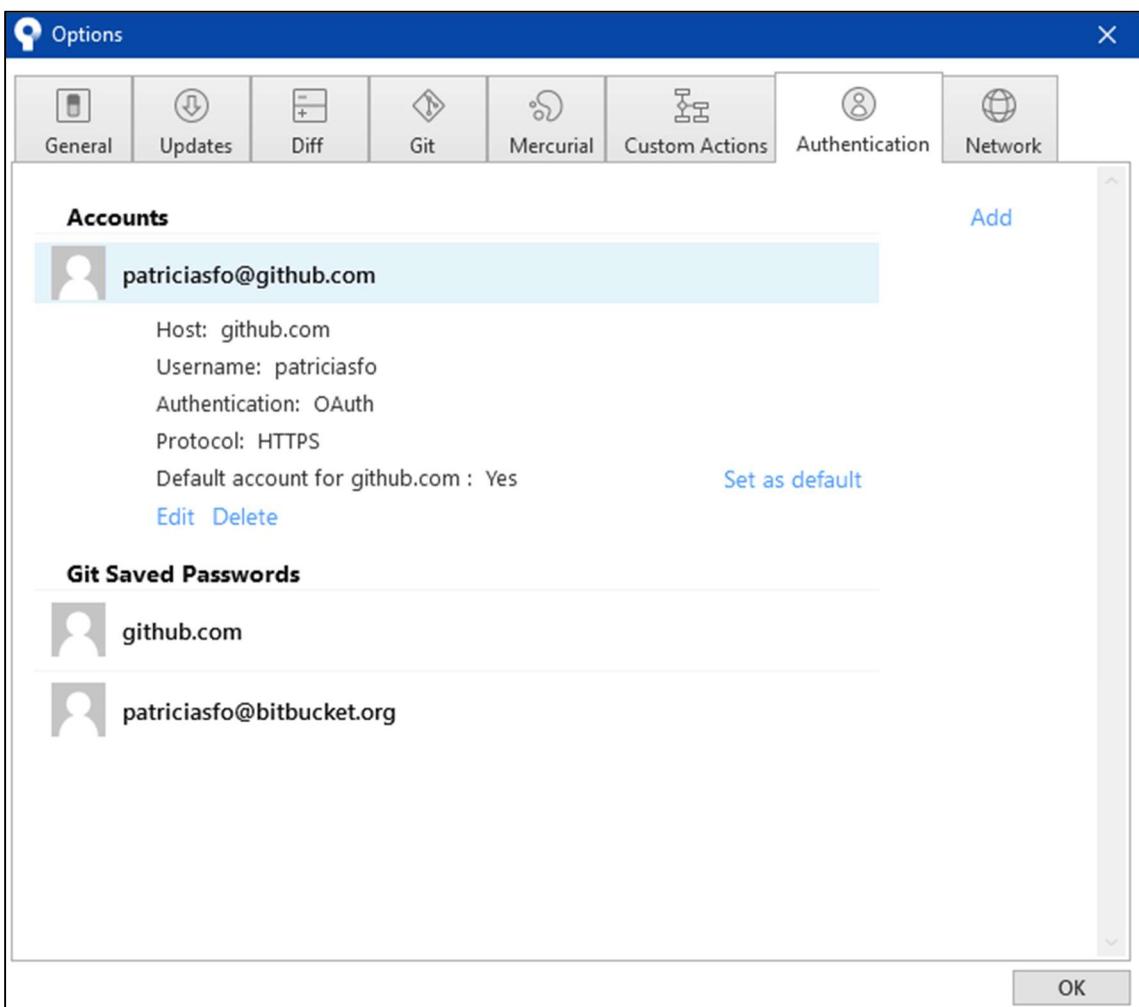

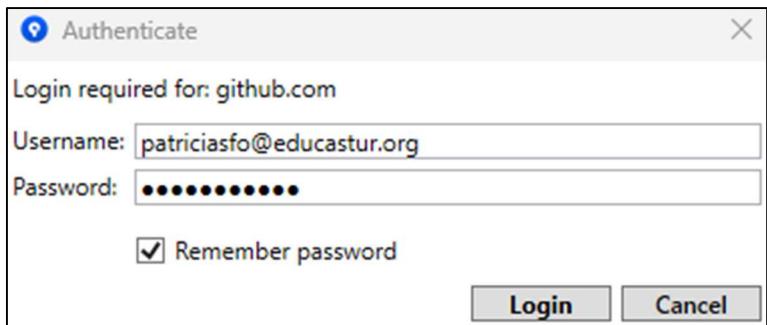

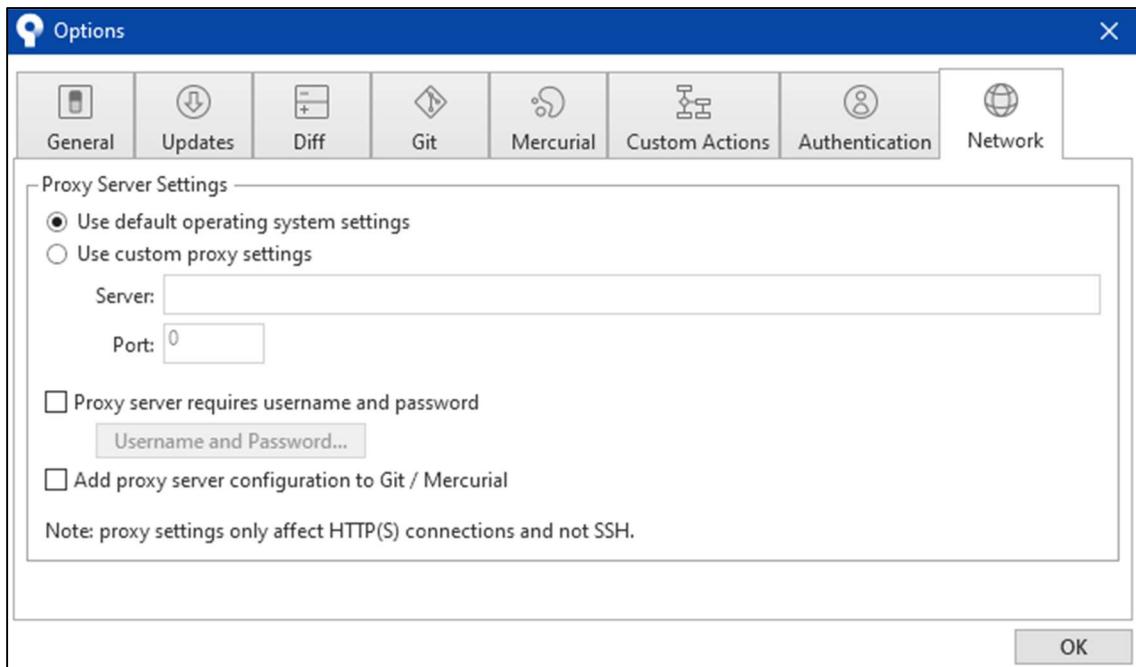

En la Authentication no tengo claro si sólo es necesario tener guardada la contraseña de github.com o también haría falta la cuenta...

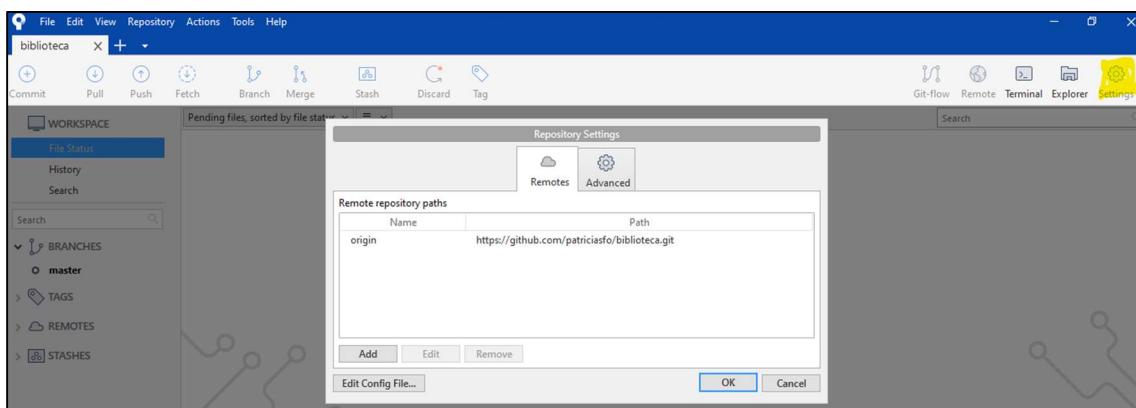

Para añadir la cuenta, pulsaríamos el botón **Add** y:

- **Configuración en Settings**

Al hacer doble click sobre el Path podemos ver los detalles.

Remote details

Required information

Remote name: origin Default remote

URL / Path: https://github.com/patriciasfo/biblioteca.git

Optional extended integration

Remote Account:

Generic Account
Generic Host

Legacy Account Settings:

Host Type: GitHub

Host Root URL: https://github.com

Username: patriciasfo@educastur.org

Extended integration is used to enable deeper integration with hosting providers such as Bitbucket, including locating existing clones when following links from sites and creating pull requests.

OK Cancel

Repository Settings

Remotes Advanced

Repository-specific ignore list

C:\Users\Patri\workspace\biblioteca\.gitignore

User information

Use global user settings

Full Name: patriciasfo

Email address: patriciasfo@educastur.org

Commit text links

Add Edit Delete

Miscellaneous

Automatically refresh (if disabled you must manually refresh this repository)

Refresh remote status in the background (if enabled in global options)

Edit Config File... OK Cancel

Ahora ya podemos empezar a trabajar con Sourcetree clonando o abriendo un repositorio e iniciando el flujo de Git.
